Personal Watercraft Cover

Heavy duty protection with an integrated trailering system

Specifications

Fabric: 300D polyester
Color: Black & Grey
Made in China

Zippered Fuel Tank Access

Rear Air Vents

Size:	Part #:	Fit:
Medium - 146.5" L x 46" W	82633	1, 2 & 3 Person PWC's up to 124" L
Large - 160" L x 48" W	82643	2 & 3 Person PWC's up to 135" L

Technical Features & Advantages

- Integrated storage bag
- Integrated trailering system with built in quick adjusting straps
- Elastic cord hem for a fast, tight fit
- Tension panels tightly secure cover for highway travel
- Quick adjusting side-release strap buckles
- Built in strap keepers secure excess strap after tightening
- Rear air vents reduce inside moisture and wind lofting
- Handy zippered fuel tank access door on both sides

Side Release Strap Buckles

ProtekX Fabric

- U.V. resistant ProtekX fabric for maximum protection against sun, rain, dirt and pollutants

Installation

1. Cover any sharp points with cloth or a sponge to avoid stressing or tearing your cover.
2. Drape your cover over your personal watercraft (PWC) with the tapered end marked "Front" at the bow.

3. Pull your cover below the rub rail around your entire P.W.C.

4. Your cover includes three straps that secure your cover to your P.W.C. (These must be used if you are transporting your P.W.C. on a trailer). Locate a strap attached to the bottom of a triangular tension panel along the hem. Run this strap under you P.W.C. to the corresponding buckle on the other side, clip it into that buckle and tighten as needed. Repeat with the other two straps.

5. After attaching ALL three straps adjust and tighten all straps so that your cover is snug and even across your P.W.C. Roll up any extra length of strap hanging below the buckle and secure it with the rip-and-grip strap keeper at the end of the strap. This will keep the strap from flapping in the wind during trailer transport. For additional security tuck the extra strap and strap keeper under the cover.

Gas Tank Doors

You can access your gas tank without removing the cover via zippered gas tank access doors on both sides of your cover.

Trailer

To use your cover when transporting your P.W.C. on a trailer you **MUST** use all the trailering straps - failure to do so will invalidate your warranty. Before driving check that all straps are tight and firmly attached, that the strap ends are secured by the strap keepers and that the gas tank doors on the cover are zipped shut. After driving the first mile, it's a good idea to recheck your cover.

Care and Cleaning

If your cover becomes dirty, it can be cleaned with lukewarm water and a soft brush. **DO NOT USE SOAP** - it can damage the protective coatings on the fabric.

Storage

To avoid mildew be sure your cover is completely dry before you store it for any extended period in its attached stuff sack.

Three Year Limited Warranty

If your cover fails due to a defect in workmanship and materials within three years from the date of purchase we will repair or replace it free of charge. Use of this cover while transporting a boat without using the trailering straps will invalidate this warranty.
